Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Examiner called first to say the claims were allowable and offered to consider additional cancelled dependent claims now that independent claim was allowable, as applicant has clearly shown a desire to work toward allowable subject matter and expedite the case. Unfortunately, examiner called back to state that a final review of the entire case could not find support for the added limitation --a driver with non-driving surfaces constructed in grooves between driving surfaces of spirally shaped walls.-- in the originally filed application spec, drawings, or claims, and thus it would be new matter. Examiner did review document incorporated by reference, USP 5,957,645 and cannot find support for the added matter. Examiner agreed to considered an amendment after final that documents suport for the limitaiton.

After several iterations, alloable subject matter was agreed to, per attached examiners amendment, and the applicant showed examiner that the driver was explicitly referred to as a "standard driver" in both this applicantion and incorporatd by reference '645, and thus the driver is not new matter.
